Our new Associates, Hannah and Lucy

Last year we were delighted to announce that our Architectural Assistants, Hannah Herringshaw and Lucy Harwood were both promoted to Associates at RLM Architects.

Hannah recently achieved a First-Class Honours Bachelor of Arts Degree in Architecture and is currently undertaking her Master's studies (RIBA Part 2 & Part 3).

Lucy achieved a Bachelor of Arts degree with upper class honours to qualify as a Part 1 Architectural Designer in 2021 and is currently pursuing her Master of Architecture and Professional Practice degree (RIBA Parts 2 & 3).

Smoke on the Water, Swanage

We are very proud to have been involved when our clients received the green light to open a new restaurant at the superb waterfront location, at the head of the pier in Swanage. The project challenges included working within the constraints of the existing occupied building, consisting of a development of luxury flats on the floors above. The finished result met and exceeded our client's expectations, through careful design to make the most of the incredible views across Swanage Bay.

The Beach Hut, Mudeford

We were excited to be involved in this Beach Hut project at Mudeford, crafted in collaboration with ECG Carpentry. We handled the planning and building regulations applications, liaising closely with BCP Council to ensure the hut met all required standards of the beach hut team. This project is a showcase of craftmanship.

We have had some great Testimonials too!

Paula Jones – Office Manager, St. John's, Wimborne

Keith, Lucy and the whole team at RLM have been invaluable in ensuring the project ran smoothly and to extremely tight deadlines.

Ashley Nicholson, Trustee, Mowlem Theatre, Swanage

A huge thanks to Keith for his patience and expertise to resolve our outstanding building regulation issues. Thank you RLM.

Paul Williams – Head of Capital Planning
Dorset HealthCare University Foundation Trust

I have been using RLM Architects for well over a decade and the service Roy and his team provide to Dorset HealthCare University Foundation Trust has been nothing short of first class.
From minor alterations, refurbishments or new builds, RLM Architects understand construction in the NHS. Responsive, always competitive and skilled at obtaining the project brief. I look forward to our continuing relationship for many years to come. I must also mention the provision of QS and Principal Designer services that RLM provide that also match the level of Roy's Architectural services.

The Mowlem Theatre, Swanage

We had the pleasure of working with the Mowlem Theatre in Swanage on internal alterations & improvements to the main bar lounge, to form a first floor accessible w.c., fire safety work and preparation of survey drawings from archive material. What a great location, so we were delighted to be involved helping to upgrade this popular theatre.

Blandford Hospital

The final Phase of the remodelling and refurbishment project at Blanford Hospital is nearly complete and is looking very smart. Working with Dorset HealthCare University NHS Foundation Trust is always a pleasure.
